Printing PostScript Files USING QUARKXPRESS 6 / ADOBEPDF 7.0 PPD / OS X v10.4 TIGER
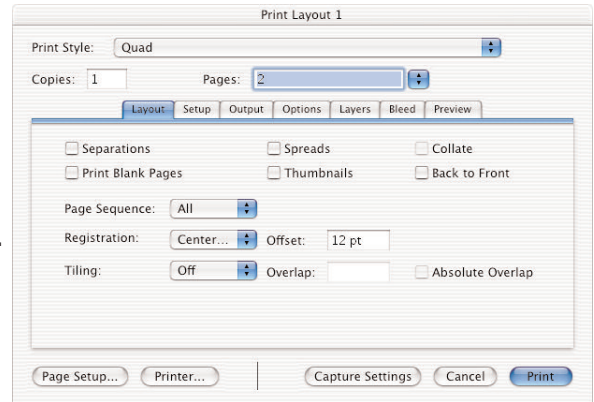

STEP 1

- The AdobePDF 7.0 ppd (ADPDF7.PPD) is automatically installed with Acrobat 7 Professional, or download from www.adobe.com or www.qg.com.

- OSX ppds reside in this location:
  /Library/Printers/PPDs/Contents/Resources/en.lprog

- Turn off the **Quark CMS** and **OPI** XTensions. There should be no OPI or Profiles tabs available in the Print dialog box.

## STEP 2 PRINT/LAYOUT . . . .

- Print one page at a time. Enter page range here.

- Separations & Spreads: Off

- Registration: Centered

- Offset: 12 pt

If you are *not* using the **Custom Bleed XTension**,

the bleed field will appear in this window:

- Bleed: .125"

STEP 3 PRINT/SETUP . . . .

- Printer Description: AdobePDF 7.0

- Paper Size: Custom

- Paper Width & Height: enter a dimension 1" wider and higher than your trim size to compensate for the inclusion of marks and bleeds.

- Reduce or Enlarge: 100%

- Paper Offset & Gap: 0"

STEP 4 PRINT/OUTPUT . . . .

- Print Colors: Composite CMYK

- Halftoning: Printer

- Resolution: 2400

- Frequency: unavailable

STEP 5 PRINT/OPTIONS . . . .
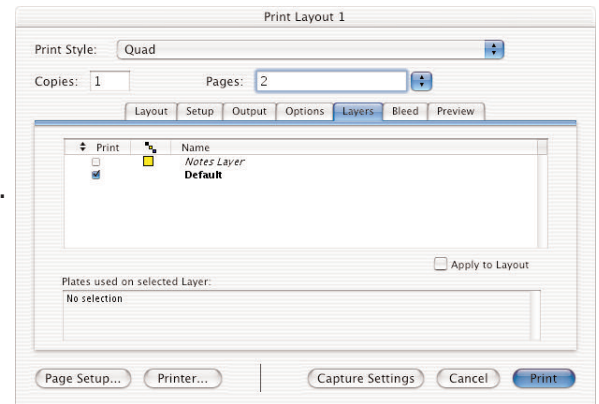

- Output: Normal

- Data: Binary

- OPI: Include Images

- Full Res of Rotated Objects: Off (only available for non-postscript printers)

- Overprint EPS Black: Off

- Full Resolution TIFF Output: On

Printing PostScript Files USING QUARKXPRESS 6 / ADOBEPDF 7.0 PPD / OS X v10.4 TIGER

(continued)

STEP 6 PRINT/LAYERS . . . .

- Make sure sure to correctly enable or suppress
  the output of layers.

STEP 7 PRINTER / BLEED . . . .

- Bleed Type: Symmetric
- Amount: .125"
- Clip at Bleed Edge

If you are **not** using the **Custom Bleed XTension**, the bleed field is located
under the Layout tab.

STEP 8 SAVE PDF AS POSTSCRIPT . . . .

- Printer: Choose a PostScript printer or virtual PostScript printer
- Choose the PDF pull-down button
- Save PDF as PostScript
- Specify a name and location for the file and click Save to return
  to the Quark Print Dialog
- Click Print
